

Kestrel® MEX

Controls and prevents:

Dollar Spot, Spring Dead Spot, Summer Patch, Brown Patch, Anthracnose and nearly 20 other troublesome turf diseases, with flexible rates for target problems and length of control desired

The Fungicide That's Tough On Diseases, But Easier On You And Your Nose.

Kestrel® MEX is a broad spectrum fungicide containing the active ingredient propiconazole. It's the first and only propiconazole-based fungicide with a "Caution" signal word instead of the "Warning" on other brands. Kestrel MEX's unique formulation also means it has little or no odor. Kestrel MEX delivers superior performance by inhibiting sterol biosynthesis to prevent

fungus growth. Its systemic mode of action then provides 21-28 days of disease control. Kestrel MEX controls many of the most troublesome diseases in cool- and warm-season turf, and can even be injected in trees to prevent Oak Wilt, Dutch Elm diseases, Dogwood Anthracnose and other problems. Kestrel MEX is compatible with many other pesticides and PGRs.

Features

"Caution" signal;
no petroleum solvents

Broad spectrum of control

Systemic mode of action

Excellent tank-mix compatibility

Wide variety of application sites

Benefits

Low odor and less risk to mixers or applicators; safe to delicate flowers, plants and turf

Saves time and makes your job easier because one product can be used to control numerous diseases, including dollar spot, summer patch and anthracnose

Long-lasting control while eliminating the need for frequent re-spraying

Economically reduce the number of applications by tank-mixing Kestrel MEX with other fungicides and insecticides that have different modes of action, such as Pegasus™, to provide broader control and reduce the risk of resistance

Can conveniently be used on all areas of golf courses, landscape ornamentals and sod farms and for tree and shrub care

Directions For Use:

Read the entire label before using Kestrel MEX. Use Kestrel MEX at rates as low as 0.5 oz. or up to 4 oz. per thousand square feet for maximum flexibility on target diseases and desired length of control. Kestrel MEX can be tank-mixed with other pesticides and PGRs, including Pegasus™ chlorothalonil, Peregrine® fungicide, T-Bird® fungicide, GoldWing® PGR, Firebird® bifenthrin and Vital® pythium fungicide.

Field Support:
