

Symmetry® NXG

Controls:

Filamentous Algae, Planktonic Algae and Branched Algae such as Chara

Breathe Easy With Symmetry® NXG.

Symmetry® NXG is an EPA-registered aquatic algaecide which gives excellent control of filamentous algae and planktonic algae. It also controls branched algae such as chara. Symmetry NXG is formulated with the superior chelating agent Triethanolamine (TEA) to provide maximum copper availability for algae control. That means Symmetry NXG

stays suspended longer in hard and turbid waters, so it delivers better performance compared to other chelates, while requiring less copper per acre than a soluble product would. Best of all, Symmetry NXG does not require NIOSH respirators, unlike the old competitive formulations.

Features	Benefits
Superior chelating agent TEA	TEA gives Symmetry NXG a higher level of copper bio-availability vs. products using less effective chelating agents, which helps you achieve optimal algae control
Binding protection	Stays available longer in hard and turbid waters (compared to soluble copper), the TEA-complex algaecidal copper in Symmetry NXG further assures reliable performance
Immediate water use	When Symmetry NXG is applied as directed, treated water may be used for drinking, fishing, swimming, watering livestock or irrigation immediately after application
User-friendly	Symmetry NXG has a 'caution' label and does not require usage of NIOSH respirators
Equipment-friendly	Less corrosive to equipment than soluble copper products

Directions For Use:

Read the entire label before using Symmetry NXG. It is a violation of Federal law to use any product in a manner inconsistent with its labeling. Symmetry NXG may be applied as a surface spray, subsurface injection or metered drip application. To improve sinking and target contact, apply Symmetry NXG with polymers or as an invert emulsion. To avoid fish kill due to oxygen depletion, do not treat more than half of the water body at one time, and wait 10-14 days before treating the remaining area.

Field Support:

When you need product or technical assistance, turn to Phoenix Environmental Care's local distributor network for responsive service and support. You can also direct any questions regarding Symmetry NXG to 1-888-240-8856 for prompt attention.
